PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 8907

SESSION NUMBER: 1

DATE OF SESSION: 890224

DATE OF REPORT: 890227

START: 0940

END: 1010

METHODOLOGY: CRV

VIEWER IDENTIFIER: 032

1. (S/NF/SK) MISSION: Access and describe the target building.
2. (S/NF/SK) VIEWER TASKING: Coordinates.
3. (S/NF/SK) COMMENTS: 032 went into AOL drive early in the session. In stage 1 he determined that the building was very tall, so as the session progressed he insisted on turning the structure into a tall office building. This is evidenced by his sketch (page 8) which is accurate except for the tall portion (labeled A) in the center. When he moved to a different section of the target near the end of the session he appeared to get back on line. The next session I will keep him away from the portion of the structure that he perceives to be a taller office area, and instead work on other areas of the structure.

4. EVALUATION: 2

- ABC separation approach to the HSC from previous project.

- Suggested on overhead suspected from a suitable vantage point; this may determine whether or not he's really on target.

START TIME: 0940L  
END TIME: 1010L

\* Site is a structure. It is a tall building in populated area, surrounded by other buildings (ADL/S like a city). The building was divided into three sections, labeled A, B, and C; for further clarification (see sketch page 8). The building has a large number of windows. There are smaller portions of structure that are attached to the larger one. See stage 3 sketches of the structure at pages 3, 4, and 8. There are guards at the bottom floor and entrance of the building.

There are offices with desks, chairs and people moving in and out of multiple rooms. The structure has elevators in it that feed into hallways. The previously mentioned offices are off of these hallways. There is also a stairwell in the building. Inside many of the offices are charts and maps hanging on the wall.

*Similar?*  
The building is several stories high, perhaps 10-15 in all. People working in the building are male and female, who are generally well dressed. People in the building are very busy -- moving from room to room at a quick pace. There was a man, well dressed in a dark suit moving down a long hallway; people were following him (ADL like aides). The man is older, with grey and black hair, wavy in texture. His demeanor is businesslike and he wastes no time in what he does. There are people handing him papers as he walks -- he is disgruntled by the presence of the people and their papers but he knows that they must be there (they are there for a reason). Concepts associated with the word "papers" are: political, demise, plans, war, crime, network, communications, and intentions.

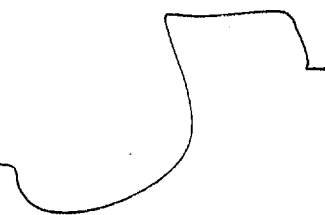

In the portion of the building designated as "C" there are machines which produce a clicking and repeated thrashing sound. There are large rolls of cloth or paper, and there is a presence of gears, wheels and pulleys. There is also a presence of boxes and packaging material.

\* ABC separation is probably not for previous project.
